Don't fail to attend the Entertainmen night at Birchard Hall, given for the benefit of the Episcopal Church. Judging from the programme the affair promises to be a rich one. OUR STEAM FIRE ENGINE.

Among the recent improvements in young city is one of Amoskeag's Steam Fire Engines. This machine was highly recommended before it was purchased and we believe was bought only on condition that it proved to be what our town needed and what was claim ed for it. The engine is a splendid looking one, and is built in a substantial and tasteful manner. It is neither too light nor is there a waste of material, but everything seems well adapted to make an easy working, complete Engine. It has been tested and found to throw a stream of water 11/6 inches in diameter 265 feet, through 50 feet of 21% inch hose. It has thrown two streams, one I inch the other 7% of an inch 190 feet through 50 feet of 216 inch bose. It has thrown a stream 1 inch in diameter 125 feet through 1500 feet of hose up a grade of fifty feet. Mr. Epiros:-We have organized a Moral Reform Association in our place with an object to benefit our people. The first address before the association was delivered by the Rev. G. R. Brown, subject "The Vice of Idleness,"-The address was a very plain and pointed one, dealing with facts, pointing out the various ways of vice into which so many of our youth are running. The entire remarks of Mr. Brown were listened to with marked attention. Rev. J. S. Broadwell delivers the next address before the association on Friday evening the ZERO.

A CARD.—Editor of Journal—In reply to many letters and inquiries from people in this section of the country, the undersigned take great pleasure in asying through the columns of your paper, that ear renowed preparation known as COR'S DYSPRSIA CURE, is a certain cure for Dyspeysia, in its worst stages. Many cures of long standing, within our own acqualataces, have been completely, and we believe permanently cared. It will stop distress after eating almost instantaneously, and enables the dyspeptic who has lived for years upon 6raham bread and the plainest dist, to eatas heartily as he pleases, and anything he chooses, without danger of distress, or souring, or rising on the stomach. It is an infallible corrector of indigestion and counting the patient to take plenty of hearty food, "which is the pacent of health," produces vigor, strength and emergy. In every trial we have known it has speedily craticated Dyspepsia with all its attendant sufferings, weaknesses, debility, and lone to the stomach and organs of digestion, and as we confidently believe, and as the published certificates in our circulars, almanaer, and in many of the leaving Journals, from couralescent patients will confers, completely, permanently, and almost miraculously "cure the worst case of Dyspeysia in existence." We warrant it in every instance. It can be obtained at all the Drug Stores in the United States and Canadax, at \$1,00 per bettle, or six bottles for \$5,00.

Dr. Proctor's

It is unnecessary to speak of the curative properties of Tar. The world knows that if its medical properties are property extracted and held in solution that there are lew if any remedies equal to it is carrieg all Throst and Lung Discoves.

The great complaint has been of Tar Bemedies, has been the want of equality is preparation—one bottle being good—the next worthless and for this reason it was abandoned by many—but now its great curative powers are again bringing it to the attention of physicians and they find no remedial agent more valued when its may is persevered in no succarr is made of the formula of Dr. Proctor and we print it in full on circular around the bottle. The Proprinters have improved upon this formula as experience has justified them in doing, and by their careful method of preparation they not only obtain all the medical virtues of the Pine Free Tar, but hold it in solution so firmly that every bottle will be of equal merit. These sole of the laste and adapted to both entiders and adults.

As a rouse giving new life and vigor to the system its both children and admiss.

As a rossic giving new life and vigor to the system the is preferable to the many "Bitters" which crowd the market and have a tendency to increase intemperance.
